arkalytics

Data Analytics & Business Intelligence for Credit Unions

Are you looking for a better way to analyze your financial data?

Arkalytics is an end-to-end business intelligence platform that combines a fully managed automated data warehouse with an entire suite of financial reports and executive dashboards.

Arkalytics helps keeps your data clean for better decision making.

Loan Workbench

Replace thousands of custom queries with one powerful tool. Drill to detail from a large portfolio down to individual loans.

Branch Manager Scorecard

Create friendly, powerful competition within your branches by setting realistic & achievable goals that drive new business.

Member Targeting

Quickly and visually define user segments based on a number of member behaviors. Compile new marketing lists in minutes.
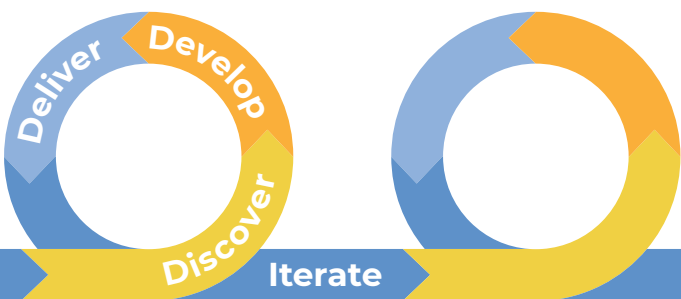

Auto Dealer Report Card

Evaluate your dealers and reach out with new information to help them drive sales and encourage more loan applications.

Data Quality Dashboard

Easily identify and act on data defects. Push the corrections back to your origination systems. Track your progress over time.

Out of the Box Dashboards

From Marketing to Originations to Collections, we've built reports for all departments across the organization.

Deliver · Develop · Discover · Iterate
